

What is ISBA?

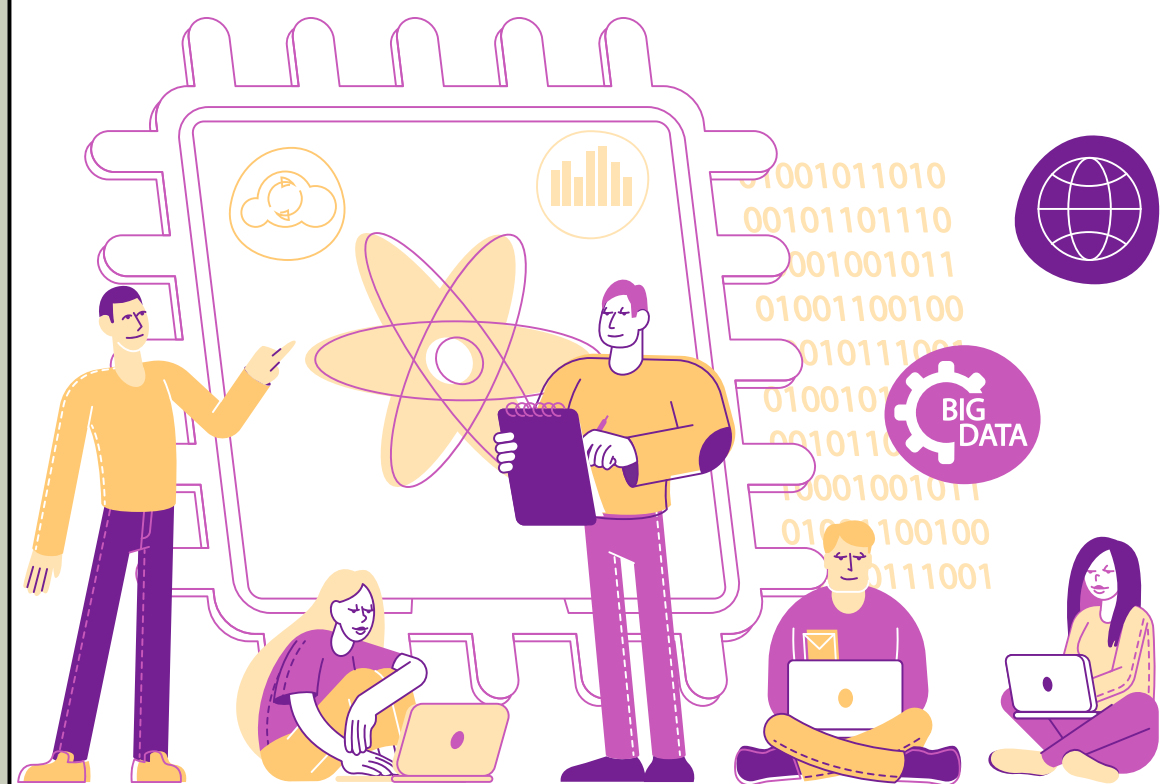

ISBA stands for Information Systems and Business Analytics. At LMU you can get a Bachelors of Business Administration or a Bachelors of Science (by taking some Computer Science Courses) in ISBA.

Programming Tools

Learning how to code in different languages like Java, JavaScript, C++, or Python

Analyzing Data

Cleaning and modeling data to draw conclusions and discover useful information for businesses.

Information Systems

Understanding how information systems help manage data, facilitate communications, and support business processes.

Advising Businesses

Using data and previous business knowledge to promote better business decisions and strategy.

ISBA equips students with technological and analytical skills to solve business problems. Students are trained in programming, database management, website development, and data analysis, empowering them to enhance operational efficiencies and drive informed decision in businesses
